

# Jeff Hill

## Project Manager / Estimator

---

### Background

Jeff Hill brings thirty one years of practical design and hands-on plumbing and mechanical experience to the firm. His knowledge, experience, background and commitment allow him to see a project from conceptual design through construction and assure that the contractor and owners goals, needs and desires are met.

While at Falcon Plumbing Jeff has been involved in a variety of projects ranging from tenant finish, core and shell, design-build and plan & spec. These projects have varied from mountain condominiums, schools, hospitals and retail projects. His experience spans several states including Colorado, Wyoming, and Arizona. In recent years his emphasis has been primarily managing work in the mountains of Colorado as well as the Grand Junction area.

Jeff's knowledge in medical gas, plumbing and HVAC has proven invaluable as he has managed many successful hospital projects. Included in these projects is St. Mary's Regional Medical Center; over the last several years he has managed numerous remodels and additions to the hospital and central plant.

Jeff's experience has provided him unique insight into the entire building design and building construction process.
